[Balancing the 5 senses for Taiwan.pdf](#)

Abstract:

**HOW TO BALANCE FOR OTITIS, UVEITIS, NASAL CONGESTION, SINUSITIS AND
INTERNAL DISORDERS.**

Each one of these problems is addressed following the Imaging format of the Balance Method from Dr. Richard Teh-Fu Tan. The author presents his integrated Balance Method approach to TCVM on each one of these sense organ conditions. The channel/organ or channels involved in each condition will be identified and following a dynamic and static balance format, acupuncture points will be chosen to help resolve the condition providing the practitioner with more tools to treat.
